March 14, 1999

Dear FDA,

The Memorandum of Understanding, in its present form, is a direct threat to the art of pharmacy compounding and is of concern to every consumer!

More women vote than men and you are stepping on the toes of many women who want and use compounded progesterone and other hormones, and you know it!

Please preserve the right of compounding and allow our physicians and we the patients the freedom of choice when it comes to our hormones!

Please get out of bed with the huge pharmaceutical companies! We want and need our natural hormones as there are no side effects and natural micronized progesterone bypasses the liver and is absorbed unlike the synthetics with all their awful side effects that you seem to want to push down our throats!

Please restore my health freedom, amend the MOU, and protect the compounding rights of pharmacists as in the FDA Modernization Act of 1997!!

Sincerely,

*Dorothy B. Anderson*
